DETAILED ACTION

Applicants' remarks and amendments filed on February 4, 2005 have been carefully considered. Claims 5 and 9 have been amended. Claims 1-4 have been canceled. Claims 5-9 are pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 5 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Fowler (4,115,467). Regarding claim 5, Fowler discloses a gas-generation device generating (Fig. 1) a hydrogen-rich gas from at least one of partial oxidation (43) of an oxygen/fuel mixture (via lines 44 and 45) or catalytic steam reforming of water/fuel mixture (32), comprising: a partial oxidation reactor (43) by which a product gas is generated (via line 48); steam reformer (32) downstream of the partial oxidation reactor (43) to which the product gas generated by the partial oxidation reactor is fed; an adiabatic, catalytic after-treatment stage (38) arranged between partial oxidation reactor (43) and the steam reformer (32) by which an oxygen content in the product gas is minimized before it is fed to the steam reformer (Col. 11, lines 3-6). Regarding claim 8,

Art Unit: 1764

Fowler discloses water or steam (via line 22) is added to the steam reformer (32). Regarding claim 9, Fowler shows on Fig. 1 that the catalytic after-treatment (38) is integrated between the partial oxidation (43) and the steam reformer (32).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fowler '467 in view of Strobel et al. (6,620,536). Regarding claims 6-7, Fowler '467 discloses a shift reaction stage 38 but fails to disclose a precious metal-containing catalyst on a catalyst support having low heat capacity. Strobel '536 teaches the catalytic after-treatment stage (2) comprises a precious metal containing catalyst of platinum (Col. 3, lines 16-20) and the catalyst is being supported by zeolite or alumina, which has a low heat capacity. Such catalyst converts or reduces the carbon monoxide concentration. Thus, it would have been obvious in view of Strobel to one having ordinary skill in the art to modify the gas generation system of Fowler '467 with an after-treatment catalyst on a catalyst support as taught by Strobel in order to facilitate the conversion of carbon monoxide to carbon dioxide and/or to reduce the concentration of carbon monoxide.

Art Unit: 1764

Response to Arguments

Applicant's arguments with respect to claims 5-9 have been considered but are moot in view of the new ground(s) of rejection. The amended claim 5 necessitates new ground of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom P. Duong whose telephone number is (571) 272-2794. The examiner can normally be reached on 8:00AM - 4:30PM.

Art Unit: 1764

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
